4 And you're ready to rock!

The best part? The all-inclusive display setup includes a full HD webcam for video conferencing, powerful speakers and a USB docking station that's capable of USB-C pass-through charging for your laptop.

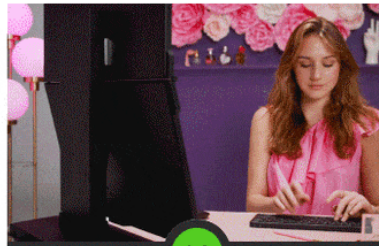

***To use the single cable, you'll need a Mobile Pixels driver. If you don't have an MP driver, two cables are needed (standard HDMI or USB-C).**

Side-by-side desktop monitors

Not ergonomically designed
Doesn't create a curved surface
Large gap between monitors
Takes up a lot of space

Geminos

- Ergonomically designed
- Creates an angled surface (sit or stand while using it!)
- Minimal gap between monitors
 - Minimal setup space
- Built-in webcam & docking station

Ergonomic design

Geminos is infinitely adjustable unlike other dual desktop monitors. The **top monitor slides up and down**, and the **bottom monitor pivots in and out** to create an angled visual appearance surface.

Stacked displays

Say goodbye to your side-by-side desktop monitor setup...

Geminos' displays are stacked from top to bottom, so the **display area is closer to a square aspect ratio**, and you can comfortably use both monitors without ergonomic setbacks.

All-inclusive workstation

Work from home? Work in an office?

Geminos is going to change your work setup! It has a **built-in 1080P webcam, powerful speakers, and a USB docking station.**

Now, you never have to worry about messy cables and attachments to create the optimal workspace.

100W USB-C pass-through charging

Geminos is capable of 100W USB-C pass-through charging.

Charge up your laptop in just 1-2 hours!

Customize your Geminos with optional accessories

Kapsule pod speaker

360 Degrees Sound
100W Amplification

Bringing Geminos to life

Jack Yao
Co-Founder

Stephen Ng
Co-Founder

Hey! I'm Jack—you may be familiar with my story, but while working at Amazon, I was constantly frustrated by the lack of a second monitor that could help me work more efficiently. I had another monitor at my previous job, so I decided to build a laptop version from a broken laptop. Soon, everyone in the office wanted one, and our flagship product, DUEX, was born!

DUEX launched on Kickstarter in June 2018 and almost immediately went viral, raising over \$1 million on Kickstarter and Indiegogo combined. Since then, my team has launched three additional Kickstarter campaigns for TRIO, DUEX Plus & DUEX Lite, and DUEX Max.

Now, we're excited to launch our fifth project, Geminos!

To our Kickstarter community, we appreciate your support and can't wait to make this happen with you again.

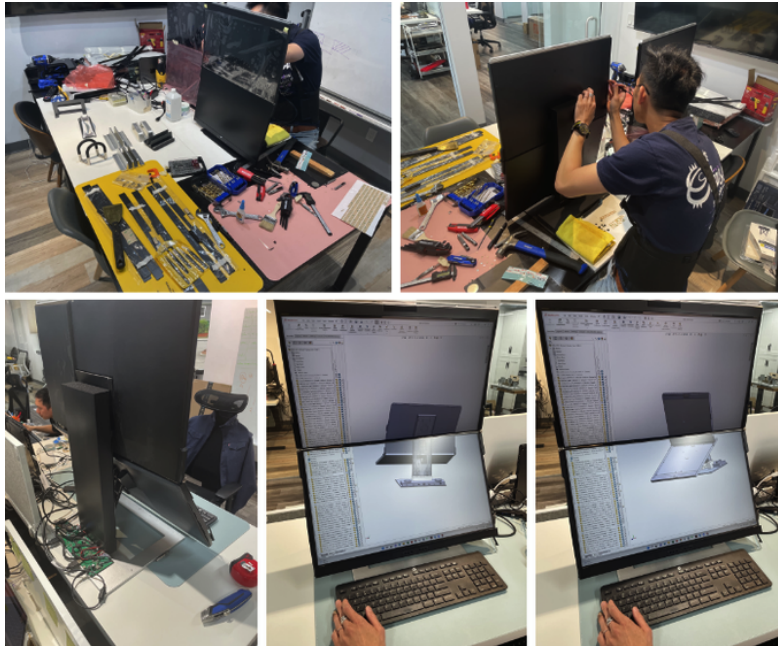

As the most trusted product launch company in the world, [Enventys Partners](#) has helped launch over 2,000 innovations with global sales of over \$1 Billion dollars for our clients.

By utilizing 20 years of experience in [product development](#), [prototyping](#), [engineering](#), [manufacturing](#), [lead generation](#), [crowdfunding campaign management](#), [public relations](#), [email marketing](#), and [paid media marketing](#)

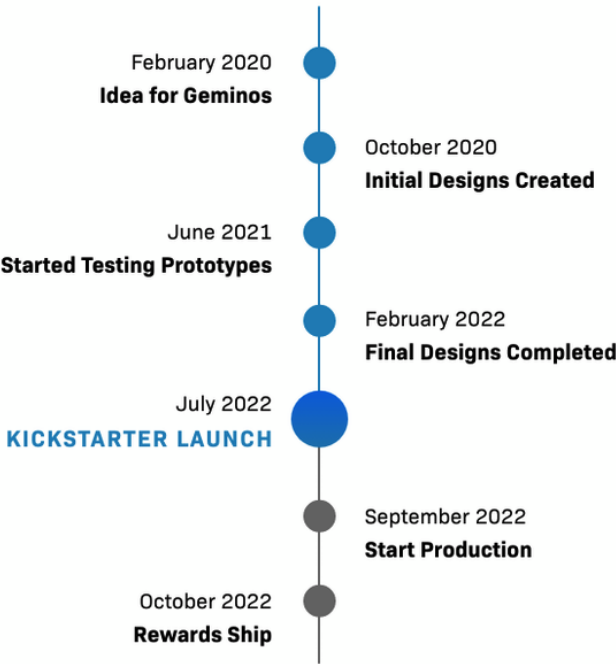

Got an idea? [We would love to help you launch it.](#)

Timeline

Please help us spread the word

To the new and old Mobile Pixels supporters, we can't thank you enough for checking out our most recent project, Geminos, and helping us make another project a reality.

We know not everyone will be able to support us with a pledge, so even if you can't give a dollar or pre-order Geminos, you can help us spread the word on Twitter, Facebook, Reddit, Instagram and anywhere else you can think of!

 SHARE GEMINOS ON FACEBOOK

リスクと課題

There are always certain risks that can arise at any moment during a project like this. That being said, we're confident in our ability to produce, and have taken all the necessary measures. We have a highly qualified team and have partnered with leading manufacturing and fulfillment companies around the world. We just need your help to bring everything to fruition. Don't worry, we're completely prepared to bring Geminos to market, and we have the manpower to make it happen, but if anything comes up along the way, you'll be the first to know.
