

## Explanation of this zip file

This zip contains two mp4 video files, this readme.txt, and its PDF file.

As stated in Abstract, this work is intended to premiere at SMC 2023, so what is recorded in this mp4 video is an experimental prototype, not the final performance form.

However, you will understand the relationship between the performance of the new instruments (new interface), the real-time generated sound, and the real-time generated graphics.

Further improvements and revisions will be made to this work in the future.
